

## TUNE-UP for the WORLD A.C. [*After Covid19*]

Globally locked in, with countless countries falling sick one after another *even the optimistic heroes of USA who in late January 2020 proclaimed the 'Covid 19' as a manageable avatar of Influenza are clueless.* Now the whole world is staring at the inevitable-**Covid 19 endemic**- after the *Novel virus* gets tired of the **Pandemic dance**. It is certain that people need to necessarily brace themselves up and align their way of life for the new world order - **WORLD A.C. [*After Covid 19*]**. ***This is not a pessimistic thought but laterally optimistic thinking.***

Numerous theories like planetary alignments, viral mutations, tampering zoonotic habitats and probable tinkering are attributed for these destructions beyond the wildest dream of anyone. Despite that, can we hypothesise that the unimaginable Global pain is because of Mother nature hitting the **RESET** button suddenly. But ***if so*** in a laterally optimistic way, can we ask ourselves **whether there are gains after this pain.**

When human beings shut themselves behind the brick and mortar, the entire ecosystem rejoiced, rivers became clean, emissions came down, animals roamed free, atmosphere cleaned up and the positive green-house effect, not realised by numerous Global enclaves became palpable. None of us imagined the **'How dare you'** voice of the young girl to reach Mother Nature so fast.

Unfortunately, the ones who perished and their dear ones will not even realise the environmental change around them. The living Dear ones may or may not come out of the dooms day gloom which hit them from nowhere. The sudden positive correction of the environment lends support to the arguments of Green earth lobbyists which till date faced dead ears and blind eyes of many policy makers. It is also a painful reality that the cleaner ecosystem brought on by a forcible **RESET** may not remain the same. When ***the locks are out***, the ***mad race*** of the world order will restart and kill the gains of the **RESET** endeavour of Mother nature.

If we are shrewd enough to take the cues, we would realise that this **RESET** is ***Mother nature's last wake-up call to RESET and REFORMAT.*** Even before this is attempted, we can hear voices of dissent about the logistical difficulties in the reformative process. But re-formatting is not going to be difficult as the ***global shakeup*** continues to forcibly convey the clear message that our **Life is finite** and our science is **NOT ULTIMATE**. We need to understand and propagate this strong message to ***halt OUR insatiable exploitation of nature.*** If we reform ourselves, we can expect a graceful exit from our ***rental domain*** of earth. If we do not comply, generations would suffer the pain of our misdeeds or **WORSE STILL** Nature would wipe out homo sapiens to save the earth.

*Fast forward our past into the future*

We are possibly standing on a turning point in history where we need to differentiate the *need* from the **greed** and **use** from *abuse* of technology to choose between *sustenance* or *consumption*. It may not be a difficult choice to make because the end of this Pandemic Dance people would have already arrived at the decision of sustaining LIFE. We should only make them understand **what is LIFE?** To understand that effectively we should take several steps backward into our past. The combinatorial power of five elements namely, the water, earth, air, fire and space and the resultant bio-energetic forces constitute LIFE. Our forefathers realised this supreme principle of LIFE and with intuitive knowledge lived an aligned LIFE. They never challenged or tried to master over them. With the advent of technology and science, knowingly or unknowingly **we enjoyed and manipulated this unconditional blessing** with our intelligence. The RESET/REFORMAT and exposure of the DORMANT pristine environmental ecosystem is not a religious or philosophical message. It is a message to make us understand that the science of five elements and bioenergetic forces they control is a *Science beyond our science*.

The denominator of change should be to choose between Economy and Life. Both parameters can be amalgamated into a SINGLE ENTITY, if Globally the individual countries resolve to rewrite the measurement of their wealth by GNH [Gross National Health] rather than GDP [Gross Domestic Product]

To achieve this goal, we need to work together as a Global team with a doctrine of COMMANDMENTS to protect the five elements of nature and obtain a balanced bio-energetic force of LIFE. This is the only safe path to march forward into the future without the threat of pandemic shake-ups to correct our misdeeds.

The authors set the ball rolling with a PRIMARY commandment that, Human beings should refrain from eating food obtained from ‘Dynamic living beings’ [*Living creatures which walk – run - crawl - swim and fly*] but eat from sources which are static [*plants*]. This is considered by the authors as ‘PRIMARY’ because it will pave the way for purification and rejuvenation of all the five elements.
